# DREAM TEAM OF WORLD CUP 2023

The Times of India's Team of the Tournament for the 2023 Cricket World Cup showcased the cricketers who left an indelible mark on the grand stage. The carefully selected eleven players were recognized for their outstanding performances throughout the tournament.

**Rohit Sharma** – Our selfless Indian captain voluntarily put the ball in the court of other batters which provoked them to play their game with a larger goal in mind. His aggression managed to put the bowlers off their line and length. He has also given a rousing starts in the semi finals and finals as well.

**Virat Kohli** – Added to his legendary status he played the perfect foil to Rohit, steadying the ship with his sheer consistency scoring 3 centuries and 6 fifties in 11 innings.

**Travis Head** – Gets the nod as the opener ahead of Quinton de Kock and Rachin Ravindra for his sheer impact in knockouts. Despite missing the first 5 matches to injury, he managed to win the Man of the Match in three of the remaining six matches, scoring 62 in 48 balls in the semifinals against South Africa before hitting a breathtaking 137 in the finals against India.

**Mitchell Starc** – The tall Aussies' inclusion lengthens the batting lineup. Starc turned up the heat at a very right time during the semi finals as well as finals. He picked up wickets in the semis with new ball ended up with figures of 3/34 whereas, in the finals he picked wickets with reverse swing towards the end of India s' innings returning with 3/55.

**Daryl Mitchell** – Scored two centuries during the tournament, both against India and managed to play both fast bowlers and spinners with great efficiency.

**Heinrich Klaasen** – Was on nitro boost, edged out KL Rahul and Mohammad Rizwan due to his super strike of 133.21. He lit up the tournament with his astonishing stroke play. His rakish century at Wankhede against England was one of the highlights of the tournament.

**Glenn Maxwell** – Fundamentally played two innings during the World Cup out of which one turned out to be the fastest century of the tournament and will be remembered for ages.

**Ravindra Jadeja** – Despite having an under par performance in the finals, his stellar performance in the preliminary matches cannot be overlooked. At the Eden Gardens against South Africa, he had figures of 5/33.

**Adam Zampa** – The Australian leg spinner had a slow pace set during the tournament however, after a couple of matches, he came into his own and picked wickets in the middle overs regularly.

**Mohammed Shami** – Bowled with a fire throughout the tournament making his upright seam position the talk of the tournament. Single handedly managed to win India's semi final against New Zealand, returned with 5 wicket hauls.

**Jasprit Bumrah** – BOOM BOOM bowling was indeed a sight to watch. His skilled bowling made batters miss the delivery by several inches giving left handers a tough time.

**Rachin Ravindra** – The 12th Man had the best ever maiden World Cup for any player by a margin. He set the ball rolling with an unbeaten match winning 123 against England in the opening match of the tournament. Also scored two more centuries against Australia and Pakistan and was instrumental in New Zealand's progress to the semi finals.

As we explore the Best 11, it becomes apparent that the Cricket World Cup was a canvas where talent flourished, and players etched their names into the history of the sport. From seasoned campaigners to emerging talents, the Team of the Tournament reflected the diverse array of skills and approaches that made the 2023 edition a cricketing spectacle.

# A BEAUTIFUL TATA STORY

It was the year 1946. Germany stood devastated by the Second World War. The Allies had won the war, and many German cities, including Munich, had been severely damaged by the British Royal Air Force. Munich, the picturesque capital of the Bavarian region of Germany, and centre of the country's diesel engine production, had suffered as many as 74 air-raids. More than half the entire city had been damaged or destroyed.

On one gloomy morning that year, at the Munich Railway station, stood the Directors of Krauss Maffei, the reputed German engineering Company. They were waiting for the arrival of their guests from India.

Founded in 1838, Krauss Maffei was a leading maker of locomotives of various types, and an engineering company with a formidable reputation. Unfortunately, the Company now stood devastated by the World War, since their factories had been destroyed by the Allied Forces.

The guests from India got down from their train. They were Directors from the Tata Group in India. If you had been there, you would have seen JRD Tata, the young, tall, lanky Chairman of the Group, get off the train. And accompanying him was a forty-year old engineer, Sumant Moolgaonkar representing TELCO (now Tata Motors). They had come to Munich for discussions with Krauss Maffei, regarding the manufacture of locomotives in India. What they found, instead, were scenes of destruction and ruin.

The Germans requested the Indians to take some of their unemployed engineers to India, alongwith their families, and provide them jobs and shelter. The Directors of Krauss Maffei are reported to have told the Tata Directors – "They are very skilled people. They will do whatever you ask them if you take care of them. They can also teach your people."

This would have to be done without a formal contract, because the British, who were still ruling India, had forbidden Indian Companies from having any contracts with German Corporations, during those times of the World War. But this request was urgent, and compelling. Because in that year, with factories lying destroyed, unemployment in Germany was rampant, and the then German currency, the Reichsmark had become almost worthless.

The Tata Directors agreed to this request, and assured the Germans that their people would be well looked after. The German engineers from Krauss Maffei then came to India, and they were provided good jobs and housing by the Tata Group. They were well taken care of, and they also rendered great service to Tata Motors. In 1945, Tata Motors had signed an agreement with the Indian Railways for manufacture of steam locomotives, and this is where the German engineers provided valuable technical expertise. They helped the Company manufacture locomotives, which were amongst the Company's very first products.

In 1947, India became independent in the 1950s, Tata Motors moved on to manufacture trucks in collaboration with Daimler Benz. Many years had now passed since that fateful meeting at the Munich Railway Station. Germany had substantially recovered from the ravages of the war, and the reconstruction effort had borne great fruit. In one of these happier years, the Board of Directors of Krauss Maffei was surprised to suddenly receive a letter from India.

This letter was from the Tata Group. It offered grateful thanks for the services of the German engineers, and it contained an offer of compensation to Krauss Maffei for the skills which had been transferred by the Germans to Tata Motors. Krauss Maffei was surprised, even taken aback at this offer. There was no legal contract, and therefore no obligation for the Tata Group to pay any compensation. In fact, I think, neither did this expectation exist, because the Tata Group had helped by providing jobs and shelter to the otherwise unemployed German engineers, during those dark days. So, the Germans were astonished, as they read the Tata letter.

This story was narrated many, many years later, in the 1970s, by Directors of Krauss Maffei, to Arun Maira, then a senior Director of Tata Motors. Arun Maira is one of India's most respected and distinguished business thinkers today. In a thoughtful article that he wrote for the Economic Times in 2005, he recollects how two elderly German gentlemen met him as part of a business transaction in Malaysia, jumped up, shook his hands, and wanted to express their deepest gratitude to him. They then narrated to him this fascinating story, which, they said, is now part of their Company's folklore.

One interesting and unexpected sidelight of this story occurred when Tata Motors was asked to provide a legally binding financial guarantee in the 1970s, but this was rendered very difficult because of the Indian Government's regulations at that time. This matter was taken up to German bankers, who said that a guarantee on a Tata letterhead, signed by the Chairman, was more valuable than any banker's guarantee.

\*I do not know what exact thoughts ran through the minds of Tata Directors in the 1950s before they sent that letter to Krauss Maffei, offering compensation where none was agreed upon or expected. But I think the Tata Group did this because it was the right thing to do.

The right thing to do is never defined by formal agreements or legal contracts alone. Neither it is defined by the expectations that others have of us. What is right is defined by our own high expectations of ourselves, by the culture of fairness and trust that we wish to establish. Are we being truly fair to the people and the companies we work with? \*

We always know if we listen deeply enough to our inner voice, whether we are being totally fair and right, the Krauss Maffei story holds such a beautiful lesson for all of us.
